BP outcome variables at 69-71y (Phase 1 Insight 46) (2019-CL)

This document details all the blood pressure measures recorded at the Phase 1 Insight 46 visit, downloaded from XNAT. Blood pressure (BP) and pulse rate (PR) were recorded using an Omron HEM-905 automated digital oscillometric sphygmomanometer.

Measurements were performed twice (one minute apart) recumbent in the right arm after 3 minutes of rest, and then twice following three minutes of standing quietly, by a Clinical Research Associate.

Summary statistics

501 participants has their blood pressure measurement completed.
